

TABLE OF CONTENTS

| | |
|---|-----------|
| Committees | v |
| Foreword | ix |
| KEYNOTES | 1 |
| Sustainable management of cultural heritage and the contribution of tourism: The case of Sintra | |
| <i>António Lamas</i> | 3 |
| Rehabilitation of historical bridges over the Danube in Budapest | |
| <i>László Dunai and Adrián Horváth</i> | 15 |
| Reuse of modern heritage | |
| <i>Ana Tostões</i> | 27 |
| Innovative traditional technologies for rehabilitation and protection of earthen structures: The Getty Conservation Institute seismic retrofitting project | |
| <i>Paulo B. Lourenço, Daniel Toreealva, Claudia Cancino, Kelly Wong, Georgios Karanikoloudis and Maria Pia Ciocci</i> | 37 |
| Restoration and protection techniques for classic Greek temples | |
| <i>Ioannis Vayas and Konstantinos Papadopoulos</i> | 49 |
| Preservation of historical bridges in USA: The Golden Gate Bridge and the Albion River Bridge cases | |
| <i>Abolhassan Astaneh-Asl</i> | 61 |
| STRUCTURAL AND EARTHQUAKE ENGINEERING | 73 |
| Influence of roof structures on seismic behavior of historic buildings | |
| <i>Alexandra Keller, Nicola Chieffo and Marius Mosoarca</i> | 75 |
| Modelling strain penetration effects in rc walls with smooth steel bars | |
| <i>Claudia Caruso, Rita Bento, António A. Correia and Romain Sousa</i> | 77 |
| The effectiveness of different retrofit solutions on the seismic performance of ‘ancient’ URM buildings | |
| <i>Bruno Calderoni, Antonio Sandoli, Emilia Angela Cordasco and Andrea Prota</i> | 79 |
| Seismic performance and the repair effect of earthen wall used for Japanese Dozo-style structures | |
| <i>Hajime Yokouchi and Yoshimitsu Ohashi</i> | 81 |

| | |
|--|-----|
| Seismic performance assessment of old frame-wall buildings in Lisbon <i>Claudia Caruso, Rita Bento, Miguel Castro and Edoardo M. Marino</i> | 83 |
| Analytically derived fragility curves and damage assessment of masonry buildings <i>Mustapha Remki, Fouad Kehila and Abderrahmane Kibboua</i> | 85 |
| Evaluation of the bond behaviour of steel reinforced grout applied to curved masonry substrate via bending tests <i>Francesca Roscini, Stefano De Santis and Gianmarco De Felice</i> | 87 |
| Towards an international database about physical models for structural design <i>Eberhard Möller</i> | 89 |
| Seismic analysis and retrofitting design of monastery in l'Aquila, "San Basilio" <i>Lorenzo Fanale, Antonio Pietrucci, Anna Romagnoli and Andrea Paone</i> | 91 |
| Strengthening of RC slabs with circular openings using FRP composite materials <i>Sorin Codrut Florut, Valeriu Stoian, Tamas Nagy-Gyorgy and Daniel Dan</i> | 93 |
| Comparison study of analytical fragility curves of RC bridge piers designed based on old and recent Algerian seismic design codes <i>Abderrahmane Kibboua, Fouad Kehila, Nadjib Hemaidi-Zourgui and Mustapha Remki</i> | 95 |
| Dynamic response assessment of a historic building from Bucharest, Romania, using the method of ambient vibration tests <i>Daniel Ioan Dima, Pavlu Teo and Constantin Budan</i> | 97 |
| The <i>in-situ</i> measured and computed dynamic response of a Bell Tower in Kefalonia, Greece <i>George Manos and Evaggelos Kozikopoulos</i> | 99 |
| The earthquake performance of basilica churches in Kefalonia, Greece including soil-foundation deformability and wall detachment <i>George Manos, Evaggelos Kozikopoulos and Lambros Kotoulas</i> | 101 |
| The structural analysis of historical structures based on image-based as-built 3D modelling using unmanned aerial vehicles <i>Krisada Chaiyasarn, Bhakapong Bhadrakom, Apichart Buatik and Nakhorn Poovarodom</i> | 103 |
| Earthquake risk assessment and mitigation investment for resilient infrastructure: the Central and South Asian experience <i>Amit Kumar, Dominik Lang and Sulaymon Sulaymonov</i> | 105 |
| Assessment of the stability condition of the Claudio Aqueduct <i>Anna Mordanova, Gianmarco De Felice and Alessandra Genoese</i> | 107 |
| Application of the NCH3332 Chilean code in the reconstruction Museum of Chanco <i>María Jesús de la Cerda, Gerardo Fercovic and Omar Pino</i> | 109 |
| Seismic assessment of an unreinforced masonry structure subjected to out-of-plane dynamic excitations by means of a discrete macro-modelling approach <i>César Chácara, Paulo B. Lourenço, Francesco Cannizzaro, Bartolomeo Panto and Ivo Calìò</i> | 111 |

| | |
|---|-----|
| Axial compression and bending tests on old masonry walls <i>Ana Marques, João Gomes Ferreira, Paulo Candeias and Maria do Rosário Veiga</i> | 113 |
| Movement control structures and technical assistance on site with TLS and GPS. Structural control of South-East zone of the Cathedral of Coria (Spain) in the work of structural improvement of the slope stability <i>Jorge Juan Romo, Manuel Sánchez Fernández, José Juan de Sanjosé, Oscar Fernández-Torres and Paula Redweik</i> | 115 |
| Is large scale seismic risk mitigation feasible – Central Asia experience <i>Md Nurul Alam, Sulaymon Sulaymonov, Amit Kumar and Pratima Rani Bose</i> | 117 |
| Developing seismic fragility curves of old hospital in Manila, Philippines <i>Michael Baylon, Herman Caranto, Arjohn Espino and Bryan Joseph Nilo</i> | 119 |
| Dynamic response of retrofitted Kütahya Merkez Kurşunlu Mosque <i>Abide Aşıkoğlu, Özgür Avşar, Fikret Kuran and Nejat Bayülke</i> | 121 |
| Application of seismic isolation in the retrofit of historical buildings. Preservation of cultural heritage in Arequipa-Peru <i>Enrique Simbort, Galvarino Pinto and Luís Becerra</i> | 123 |
| Analysis of reinforced concrete beams using the ANSYS customization system (UPF) <i>Paula Manica Lazzari, Américo Campos Filho, Bruna Manica Lazzari, Alexandre Rodrigues Pacheco and Daniel Hastenpflug</i> | 125 |
| Efficiency of FRM materials for strengthening masonry and concrete elements <i>Francesca Ceroni and Piera Salzano</i> | 127 |
| Proposal of a new constitutive model for SMA with internal loops <i>Kacper Wasilewski and Artur Zbiciak</i> | 129 |
| Recent developments on the use of rigid block models for collapse mechanism and dynamic analysis of masonry structures <i>Francesco Portioli, Lucrezia Cascini and Raffaele Landolfo</i> | 131 |
| Numerical analysis of rural timber framed masonry influenced by shallow foundations <i>Meera Ramesh, Pavel Kuklik and Vera Hlavata</i> | 133 |
| Seismic damage and loss estimation for Bucharest, Romania <i>Florin Pavel, Ileana Calotescu and Radu Vacareanu</i> | 135 |
| Mechanical properties of concrete from buildings constructed in 1953-1974 <i>Hideo Araki</i> | 137 |
| Evaluation of seismic damage from questionnaire results <i>Ileana Calotescu, Florin Pavel, Ana-Maria Sandulescu, Horea Sibisteanu and Radu Vacareanu</i> | 139 |
| Behaviour of Greek columns during earthquakes with and without tendon system <i>Ferran Obón Santacana, Uwe Dorka, Chuyen Nguyen and Luigi Petti</i> | 141 |
| The use of macro-element approach for the seismic vulnerability assessment of stone masonry buildings <i>Rui Maio, Tiago Ferreira and Romeu Vicente</i> | 143 |

| | |
|---|-----|
| Methodology to support the design of buildings' seismic protection using viscous dampers <i>Micaela Gonçalves and Luís Guerreiro</i> | 145 |
| Seismic experimental data sharing and FE calibration on scaled mock-ups of historic masonry structures through the ENEA CRESCO infrastructure <i>Marialuisa Mongelli, Irene Bellagamba, Gerardo De Canio, Gabriele Giovanetti, Francesco Iannone, Samuele Pierattini, Ivan Roselli, Silvio Migliori, Andrea Quintiliani, Fiorenzo Ambrosino, Giovanni Bracco, Agostino Funel, Guido Guarnieri and Giovanni Ponti</i> | 147 |
| Global behavior of historical masonry structures and timber roof framework <i>Nicola Chieffo, Iasmina Apostol, Alexandra Keller, Marius Mosoarca and Anna Marzo</i> | 149 |
| Analytical study on the seismic retrofitting of a historic reinforced concrete temple using friction dampers <i>Kazutaka Shirai, Masaru Kikuchi, Tomoaki Ito and Ken Ishii</i> | 151 |
| Seismic vulnerability assessment of "Sion Cathedral", Switzerland: An integrated approach to detect and evaluate local collapse mechanisms in heritage buildings <i>Lorenzo Diana, Yves Reuland and Pierino Lestuzzi</i> | 153 |
| Methodology for nonlinear three-dimensional analysis of Pombalino buildings <i>Bruno Candeias, João Azevedo and António Sousa Gago</i> | 155 |
| Strengthening of rammed earth structural elements. Mechanical behaviour under shear and cyclic shear-compression loading <i>Lorenzo Miccoli, Urs Müller and Patrick Fontana</i> | 157 |
| Seismic risk assessment of the Santa Maria a Vico Bell Tower. Ambient vibration measurements and numerical model tuning <i>Massimiliano Ferraioli, Lorenzo Miccoli and Donato Abruzzese</i> | 159 |
| Evaluation of the seismic resistance of "Pombalino" timber framed walls <i>Ana Gonçalves, João Gomes Ferreira, Luís Guerreiro, Paulo Candeias and Alfredo Campos Costa</i> | 161 |
| Theoretical and experimental investigation on precast reinforced concrete wall panels with cut-out openings subjected to shear force <i>Carla Todut, Daniel Dan and Valeriu Stoian</i> | 163 |
| Preparation of a guideline for earthquake risk management of historical structures in Turkey <i>Zeynep Ahunbay, Gulay Altay, Gorun Arun, Olcay Aydemir, Fevziye Atasagun, Zekai Celep, Murat Altug Erberik, Alper Ilki, Fikret Kuran, Zeynep Gul Unal, Fevziye Aköz, Nilgün Olgun, Muradiye Simsek, Yalçın Kaya and Yunus Uçar</i> | 165 |
| Earthquake protection of monuments - Swiss interdisciplinary guidelines <i>Friederike Braune and Karin Zaugg-Zogg</i> | 167 |
| Earthquake vulnerability of traditional Bulgarian buildings from the period of the Revival <i>Marina Traykova and Tanya Chardakova-Nackova</i> | 169 |

| | |
|---|-----|
| Preliminary and sensitivity analysis to set the investigation plan for the seismic assessment of existing buildings <i>Jamil Haddad, Serena Cattari and Sergio Lagomarsino</i> | 171 |
| Capacity curves for reinforced concrete buildings designed in accordance with 1983 Portuguese regulation <i>Maria João Falcão Silva</i> | 173 |
| Analysis of the structural behaviour of the historical constructions: Seismic evaluation of the Cathedral of Valencia, Spain <i>Verónica Llopis Pulido, Adolfo Alonso Durá, Arturo Martínez Boquera and Ernesto Fenolosa Forner</i> ... | 175 |
| Out of plane behavior of unreinforced clay brick walls <i>Claudio D'Ambra, Gian Piero Lignola, Francesco Fabbrocino, Elio Sacco and Andrea Prota</i> | 177 |
| Incremental analysis of masonry barrel vaults <i>Giancarlo Ramaglia, Gian Piero Lignola, Francesco Fabbrocino and Andrea Prota</i> | 179 |
| Quasi-brittle structures under cyclic shear: A d+/d- damage model with enhanced stiffness recovery capabilities <i>Claudia Tesei and Miguel Cervera</i> | 181 |
| Seismic retrofitting of a reinforced concrete school building using dissipative steel braces <i>Massimiliano Ferraioli, Angelo Lavino, Gennaro Di Lauro and Alberto Mandara</i> | 183 |
| Determination of mechanical properties of blend bricks used in historical structures <i>Başak Zengin, Burak Toydemir, Serhan Ulukaya, Didem Oktay, Nabi Yüzer and Ali Kocak</i> | 185 |
| The use of a CFRP reinforced render in the seismic strenghtening of old buildings <i>João Alexandre Guerreiro, Filipe Dourado and José Paulo Costa</i> | 187 |
| Understanding and modelling crack patterns in an ancient masonry building <i>Paola Condoleo and Alberto Taliercio</i> | 189 |
| An experimental study on strengthening brick arches <i>Emad Abdulahad, Jolina Tsenkova and Fantina Rangelova</i> | 191 |
| Historical earthquakes and historical building archetypes for dynamic structural analysis using historical surveys <i>Eduardo Charters, László Vigh and János Krähling</i> | 193 |
| Athenian Acropolis: Records and numerical simulations for the assessment of the dynamic response of the hill and the seismic distress of the masonry perimeter wall <i>Prodromos Psarropoulos, Eleni Kapogianni, Ioannis Kalogeras and Michael Sakellariou</i> | 195 |
| Seismic response analysis in an 8-story building with elastomeric base isolators <i>Joel Ojeda, Carlos Flores and Alberto Parra</i> | 197 |
| Probabilistic damage scenario: A case study in Amatrice affected by the 2016 seismic sequence <i>Antonio Formisano, Nicola Chieffo and Marius Mosoarca</i> | 199 |

| | |
|---|-----|
| Urban resilience of a built-up area in the municipality of Marigliano, Naples, Italy <i>Antonio Formisano, Nicola Chieffo and Marius Mosoarca</i> | 201 |
| Seismic vulnerability and damage of a historical centre in the district of Caserta, Italy <i>Antonio Formisano, Nicola Chieffo, Marius Mosoarca and Raffaele Landolfo</i> | 203 |
| Mechanical characteristics of stone masonry of bridges: Experimental evaluation and numerical simulations <i>Cristina Costa, Rúben Silva and António Arêde</i> | 205 |
| In-plane behavior of rubble stone masonry walls: Numerical and analytical approach <i>Paulo B. Lourenço and João Pereira</i> | 207 |
| EPI-CIDADE - Methods of seismic assessment and retrofitting masonry buildings <i>Rita Moura</i> | 209 |
| EPI-CIDADE – Experimental dynamic characterization of a RC building: Case study <i>Jelena Milosevic, Ana Simões, Rita Bento and Rita Moura</i> | 211 |
| Structural health assessment and vulnerability analysis of reinforced concrete cooling tower and flue gas stack of a thermal power plant (TPP): A case study <i>Carlo Andrea Castiglioni, Angelo Silvio Rabuffetti, Gian Paolo Chiarelli, Giovanni Brambilla and Julia Georgi</i> | 213 |
| Cyclic response of brick-cement mortar masonry shear walls retrofitted with steel grids <i>Mattia Zizi, Francesco Campitiello, Adrian Ioan Dogariu and Gianfranco De Matteis</i> | 215 |
| Seismic vulnerability assessment of churches at large scale territorial scale: Calibration on a methodology on the basis of the 2009 L’Aquila earthquake <i>Gianfranco De Matteis, Giuseppe Brando, Valentina Corlito and Emanuela Ciber</i> | 217 |
| Seismic risk assessment of one nave complex churches of the Alife-Caiazzo diocese of Caserta <i>Valentina Corlito, Mariateresa Guadagnuolo, Anna Tafuro and Gianfranco De Matteis</i> | 219 |
| Structural types and seismic behaviour of cloisters <i>Mariateresa Guadagnuolo, Marianna Aurilio, Gianfranco De Matteis and Giuseppe Faella</i> | 221 |
| Protection of historical buildings from fire hazard in seismic areas: A case study <i>Roberta Fonti, Antonio Formisano and Federico M. Mazzolani</i> | 223 |
| Compressive strength of historic masonry based on destructive and non-destructive test results <i>Miroslav Sykora, Milan Holicky, Jana Markova, Eduardo Charters and Dimitris Diamantidis</i> | 225 |
| Simulation of the out-of-plane seismic response of masonry panels strengthened with SRG <i>Marialaura Malena, Bartolomeo Panto and Gianmarco De Felice</i> | 227 |

| | |
|--|-----|
| Comparison between BRB and FRP for seismic retrofitting of existing RC buildings through a case study <i>Federico M. Mazzolani, Antonio Formisano and Generoso Vaiano</i> | 229 |
| Frequency of vibration of a few structures of patrimonial value: Description of a <i>in-situ</i> data-base <i>Carlos Sousa Oliveira</i> | 231 |
| INTERVENTION STRATEGIES | 233 |
| Waste management for post-fire emergency services at the Museum of the Portuguese Language – São Paulo <i>Julia Polli and Fabiana Oliveira</i> | 235 |
| Assessing historic bridge bearings – the capability of thermo-mechanic characteristics to identify the historic bearing’s material <i>Volker Wetzck and Franziska Pannasch</i> | 237 |
| The damage assessment of the monumental travertine façade of the Banco di Napoli Palace in Via Toledo in Naples, Italy <i>Beatrice Faggiano, Roberta Fonti and Raffaele Landolfo</i> | 239 |
| Reduction of peak ground acceleration for monumental buildings via subsoil treatments: The case study of Villa Favorita <i>Luisa Alterio and Gianpiero Russo</i> | 241 |
| Post seismic expertises: For what purposes? <i>Yamina Ait Meziane and Rania Souici</i> | 243 |
| Documentation processes for conservation and restoration actions towards modern architecture <i>Fabiana Oliveira and Valéria Bonfim</i> | 245 |
| Sustainable diagnosis of historic buildings in the process of revitalization on the example of the historic tenements in Warsaw <i>Wojciech Terlikowski</i> | 247 |
| The importance of laser scanning in identification, diagnostics and preservation of ancient architectural monuments: Case study of archaeological sites in Egypt and Russia <i>Martyna Gregoriou-Szczepaniak, Wojciech Terlikowski, Kacper Wasilewski, Ewa Sobczyńska and Piotr Bartosiak</i> | 249 |
| Vertical addition as a seismic retrofit strategy: The inter-story isolation system for existing masonry buildings <i>Diana Faiella, Francesco Verrone, Bruno Calderoni and Elena Mele</i> | 251 |
| The impact of daylighting in energy efficiency and indoor comfort in historic buildings <i>António Santos and Maria do Rosário Veiga</i> | 253 |

| | |
|---|-----|
| Real estate valuation for seismic risk management <i>Hemilce Benavidez, Silvia Aladro and Wilfred Harrington</i> | 255 |
| Structural intervention case in the Theatro Municipal do Rio de Janeiro <i>Danielli Cintra, Deane Roehl, Emil Sánchez Filho, Manuel Santos, Geraldo Filizola and Marisa Assumpção</i> | 257 |
| Implementation of tuned liquid dampers for seismic protection in modern movement architecture buildings <i>Maria João Falcão Silva</i> | 259 |
| Foundation reinforcement of Tua Bridge in Douro railway – The role of monitoring in the continuous integrity evaluation of the existing centennial structure <i>Nuno Miguel Dias, Carlos Baião, Jaime Santos, Maria Eugénia Resende, Paulo Pinho, José Nuno Figueiredo, Teresa Santos and José Muralha</i> | 261 |
| Development of a non-destructive test to assess the quality of the new pieces of glass smalti from Murano (Italy) used in the "Trencadís" cladding <i>Marc Cuesta, Joan Lluís Zamora and Jaume Roset</i> | 263 |
| Structural diagnosis and preliminary seismic vulnerability assessment approach of residential buildings in Peru <i>Mauricio Gonzales, Guido Silva, Susana Moreira and Rafael Aguilar</i> | 265 |
| The preservation of modern architecture in Brasília – A study of stress zones <i>Bruna Lima, Thaisa Leite and Vanda Zanoni</i> | 267 |
| Measures for resource and sustainable practices management in building rehabilitation <i>Rui Oliveira, Jorge Lopes and Isabel Abreu</i> | 269 |
| Condition and future use of early age steel bridges in a historic city <i>Philippe Van Bogaert</i> | 271 |
| Traffic vulnerability of Dey Palace structure in the Casbah of Algiers <i>Mohammed Naboussi Farsi, Assia Bouchelouh and Nabila Guessoum</i> | 273 |
| MATERIALS AND TECHNOLOGIES | 275 |
| Characterization of renders from buildings awarded with Lisbon's Valmor Prize of Architecture (1902 – 2002). State of conservation and contributions for preservation <i>Luís Almeida, António Santos Silva, Maria do Rosário Veiga and José Mirão</i> | 277 |
| Non-standard testing of mechanical characterization to support the conservation of old renderings <i>Maria do Rosário Veiga, Ana Rita Santos, Ana Marques and Dora Santos</i> | 279 |
| Eco-efficiency of steel fiber-reinforced cement composite with recycled materials <i>Sun-Woo Kim, Wan-Shin Park, Young-Il Jang, Gwon Young Jeong, Ji-Hyun Kim, Da-Ae Youn and Hyun-Do Yun</i> | 281 |

| | |
|--|-----|
| Investigation on the building structural damages of the Kathmandu nine-story Basantapur Tower in 2015 Nepal M8.1 Gorka earthquake <i>Boyuan Shi and Junwu Dai</i> | 283 |
| Adaptive semi-active fuzzy control for steel frame buildings subjected to seismic excitation <i>Andrés Guzmán, Andrés Cardozo, Diego Ceresuela and Juan Reyes</i> | 285 |
| Materials and techniques for traditional Romanian residential houses <i>Andreea Dutu, Daniel Ioan Dima and Eliza Bulimar</i> | 287 |
| Technological evolution of processes used in construction: museum of civil engineering <i>Alcinia Zita Sampaio</i> | 289 |
| Non-destructive tests and vulnerability evaluation of the structure and foundations of the Iglesia del Sagrario, in Seville Cathedral <i>Antonio Jaramillo-Morilla, Emilio J. Mascort-Albea, Rocío Romero-Hernández, Jonathan Ruiz-Jaramillo and Eduardo M. Diz-Mellado</i> | 291 |
| Study of replacement of sand by expanded polystyrene (PS) in structural lightweight concrete <i>Mateus Titton Tostes and Daniel Hastenpflug</i> | 293 |
| Effect of externally bonded FRCM materials on the behavior of masonry walls <i>Gian Piero Lignola, Antonio Bilotta and Francesca Ceroni</i> | 295 |
| Iron alloys and structural steels from XIX century until today: Evolution of processes and mechanical properties <i>Gianmaria Di Lorenzo, Antonio Formisano, Angelo Avallone and Raffaele Landolfo</i> | 297 |
| Structural window frame for seismic strengthening of masonry wall buildings <i>Jorge Miguel Proença, António Sousa Gago and André Vilas Boas</i> | 299 |
| Massive masonry construction and System DC90 <i>Zoran Petrašković, Svetlana Janković Miladinović and Žarko Petrašković</i> | 301 |
| Performance of adobe vaults strengthened with LC-TRM: An experimental approach <i>Neda H. Sadeghi, Daniel V. Oliveira, Rui Silva, Nuno Mendes, Mariana Correia and Hamed Azizi-Bondarabadi</i> | 303 |
| Seismic assessment and base isolation retrofit of a modern heritage r/c swimming pool building <i>Stefano Sorace and Gloria Terenzi</i> | 305 |
| Trimbrel vault – A traditional constructive technique <i>João Rei and António Sousa Gago</i> | 307 |
| Comparison of old masonry structures' seismic forces based on old and recent building codes <i>Kumars Zandparsa</i> | 309 |

| | |
|--|-----|
| Failure modes of the connection by anchors between wooden floors and masonry walls <i>Cláudia Justiniano, Fernando Pinho and Válder Lúcio</i> | 311 |
| The drilling resistance measurement on the characterisation of low-strength mortars <i>Rita Nogueira, Ana Paula Ferreira Pinto and Augusto Gomes</i> | 313 |
| Influence of some aggregates of diverse nature on the characteristics of lime mortars <i>Rita Nogueira, J. Alexandre Bogas and Fábio Costa</i> | 315 |
| Thermal characterization of historical buildings: Methods, problems and potentialities <i>Pammila Japiassú and Cláudia Naves David Amorim</i> | 317 |
| Durability of the Japanese concrete structures on Sakhalin Island <i>Eugeny Shalyi, Sergei Leonovich, Lev Kim and Alexey Dzhogolyuk</i> | 319 |
| Biocementation for cracks rehabilitation of different construction materials <i>Rafaela Cardoso, António Monteiro, Inês Flores-Colen and Gabriel Monteiro</i> | 321 |
| Natural hydraulic lime in rehabilitation <i>André Correia, Ana Santos and Dina Frade</i> | 323 |
| Thermal solutions with cork <i>Luís Duarte, Rita Sousa and André Correia</i> | 325 |
| Experience in structural intervention in existing buildings <i>Luís Miguel Villar, José Pedro Venâncio and Maria do Carmo Vieira</i> | 327 |
| Reinforcement and rehabilitation of the Valença International Bridge foundations at pk 131.451 of the Minho line <i>Miguel Mimoso, Nuno Caseiro and Rui Rodrigues</i> | 329 |
| Building materials with historical and heritage interest – A database in progress <i>António Santos Silva, Maria João Correia, Luís Rato and Nuno Matos</i> | 331 |
| Piezoresistive characteristics of cement composites with carbon black <i>Ji Hyeon Kim, Da-Ae Youn, Gwon Young Jeong, Seok Joon Jang and Hyun-Do Yun</i> | 333 |
| On the use of timber-based panels for the seismic retrofit of masonry structures <i>Ivan Giongo, Gianni Schiro and Maurizio Piazza</i> | 335 |
| Influence of water reducers on the early age properties of aerial lime mortars <i>Ana Paula Ferreira Pinto, Augusto Gomes, Bruna Silva, António Candeias and Francisco do Vale</i> | 337 |
| Role of different admixtures on the properties of an aerial lime mortar <i>Ana Paula Ferreira Pinto, Augusto Gomes, Bruna Silva, António Candeias and Francisco do Vale</i> | 339 |
| New approaches on managing cultural heritage conservation through digital image acquisition and processing - Characterization of pathologies in historical tiles <i>Carlos Marques, Ana Rodrigues, Gonçalo Pais Simões, Vasco Ferreira, Nuno Charneca and César Rocha</i> | 341 |

| | |
|--|-----|
| Non-standardized data in the BIM process – The management of constructive systems data in the cultural heritage conservation <i>Nora Lombardini and Lorenzo Cantini</i> | 343 |
| Behaviour under fire exposure of GFRP-reinforced concrete slabs <i>Pedro Santos, Inês Rosa, João Firmo, João Ramôa Correia and Adriana Azevedo</i> | 345 |
| Structural upgrade of reinforced concrete building frames using replaceable hysteretic steel-based fuse elements <i>Dan Dubina, Florea Dinu, Calin Neagu, Ioan Marginean and Daniel Dan</i> | 347 |
| Effect of elevated temperatures on the bond behaviour of GFRP bars to concrete: Pull-out tests <i>Inês Rosa, Luís Granadeiro, João Firmo, João Correia and Adriana Azevedo</i> | 349 |
| Design formulations for dissipative metal shear panels <i>Simone D’ Ortona, Giuseppe Brando, Pasquale Bencivenga and Gianfranco De Matteis</i> | 351 |
| Study of the materials of historical buildings by sem analysis processed in GIS system <i>Stefania Bruni, Giuseppe Marghella, Anna Marzo and Lorenzo Moretti</i> | 353 |
| Pozzolanic properties of incinerator bottom ashes and their effect on lime pastes <i>Radson L. Figueiredo and Sara Pavia</i> | 355 |
| Experimental program for historic and contemporary strengthening of wood connections and advanced measurements by laser scanning and image tracking <i>Kenneth Ogorzalek, Blake Dilsworth and Shakhzod Takhirov</i> | 357 |
| ARCHITECTURE AND URBAN PLANNING | 359 |
| Geospatial study of the Torre de Belém in Lisbon, allying laser scanning and photogrammetry <i>Paula Redweik, Manuel Sánchez Fernández and José Juan de Sanjosé</i> | 361 |
| The superior hydraulic system in Gothic sacred architecture. Cases of studies in Lisbon <i>Ana Alho</i> | 363 |
| Complex features in assessing historic roof structures <i>Ioan Andreescu and Alexandra Keller</i> | 365 |
| Conservation problems and recommendations for Hagia Nicholas Rock-Cut Abbey, Turkey <i>Engin Akturk, Busra Akturk and Serife Ozata</i> | 367 |
| Mussolini’s swimming pool in the former Palazzo delle Terme (current Palazzo del Coni) at the Foro Italico, Rome: Historic analysis and conservation <i>Lisandra Franco de Mendonça</i> | 369 |
| Enhancing the image. Interventions in historic areas as revigorating development tools <i>Ioan Andreescu, Vlad Gaivoronschi and Mihai-Ionut Danciu</i> | 371 |
| The bird’s nurseries of the Belém Palace <i>Pedro Vaz and Bárbara Massapina Vaz</i> | 373 |

| | |
|--|-----|
| The evolution of the timber structure system of the Buddhist buildings in the regions South of the Yangtze river from 10th to 14th century based on the main hall of Baoguo Temple | |
| <i>Liu Jie, Zhang Leiming, Cao Chen and Bill Li Yu Chen</i> | 375 |
| Numerical verification of the wooden structure of fortified settlement from the Early Iron Age in Biskupin | |
| <i>Ewa Sobczyńska, Wojciech Terlikowski, Jarosław Kopiasz, Martyna Gregoriou-Szczepaniak and Kacper Wasilewski</i> | 377 |
| Conservating, renovating and revitalizing historic road bridges – Reconciling history with modern-day requirements | |
| <i>Andrzej Marecki and Kacper Wasilewski</i> | 379 |
| Structural rehabilitation of the Oshk Vank Monastery located in the historical region Tao-Klardjeti | |
| <i>Cenk Ustundag, Gokhan Yazici and Guzide Aslankaya</i> | 381 |
| The cloister of Santa Clara-a-Nova Monastery. Analysis of the architectural typology used at the time of the Portuguese Restoration | |
| <i>Pedro Tavares, Sofia Guilherme and Fernando Pereira</i> | 383 |
| Rehabilitation of two pavilions at the astronomical observatory of the University of Coimbra | |
| <i>Cláudia Silva</i> | 385 |
| Evolution of an heritage edifice from Colossus in Prora to Colossus of Prora | |
| <i>Hartmut Pasternak and Nataša Živaljević-Luxor</i> | 387 |
| Why is the valorization of the BRT as cultural heritage important? | |
| <i>Tatiana Gadda, Ana Garcia, Lorena Fuchs, Leticia Santos, Lucas Santana and Cesar Augusto Romano</i> | 389 |
| Conquering the Moorish Castle: Global enhancement and restoration | |
| <i>Daniel Vaz Silva, Vanessa Ferreira and António Lamas</i> | 391 |
| Measuring accessibility in the cultural landscape of Sintra | |
| <i>Carolina Martins, Teresa Heitor and António Lamas</i> | 393 |
| The Ottoman Mosques in the city of Serres, Greece | |
| <i>Maria Loukma, Maria Stefanidou and Vasiliki Mouza</i> | 395 |
| Modern heritage in contemporary Maputo's city of cement | |
| <i>Lisandra Franco de Mendonça</i> | 397 |
| Preservation of architectural heritage in a museum context | |
| <i>Alcinia Zita Sampaio</i> | 399 |
| Rehabilitation of the waterfall and gardens of the Caxias Royal Estate | |
| <i>Filipa Thedim</i> | 401 |
| The former San Antonio Mill and textile factory, industrial heritage of Queretaro city, Mexico | |
| <i>Andres A. Torres-Acosta</i> | 403 |

| | |
|---|-----|
| Assessing the value of built heritage in Vienna <i>Barbara Bucher and Andreas Kolbitsch</i> | 405 |
| The tectonic expression and the conservation state <i>Ingrid Meira, Thiago Goes and Vanda Zanoni</i> | 407 |
| Expanding visiting circuits and improving accessibility in the oldest Portuguese Royal Palace <i>Carolina Martins, Cristina Pedrosa, Gonçalo Pais Simões and Isabel Rocha</i> | 409 |
| Architectural heritage of small resort cities in Southern Georgia, Samtskhe-Javakheti Region <i>Tamar Khoshtaria and Nino Chachava</i> | 411 |
| Methods for examination and recovery/rehabilitation of the immovable cultural heritage in Bulgaria <i>Marika Georgieva and Fantina Rangelova</i> | 413 |
| The conservation project of the rendering tiles in the Sintra National Palace kitchen inner walls <i>Vanessa Rodrigues, Carlos Marques and Gonçalo Pais Simões</i> | 415 |
| Capturing the incalculable <i>Francesca Albani and Carlo Dusi</i> | 417 |
| Conservation of the National Palace of Sintra and adaptation for tourism and cultural purposes <i>Cristina Pedrosa, Daniel Silva and Gonçalo Pais Simões</i> | 419 |
| Dialogues between Luís Saia's practice of restoration and european restoration theories: The case of the restoration intervention in the Church of Nossa Senhora do Rosário, Embu das Artes, 1938 <i>Camila Corsi Ferreira</i> | 421 |
| Importance of using lime mortar in the restoration of facades covered by tiles manufactured in the late 19th and early 20th century <i>Flavia Cajado</i> | 423 |
| The dialogue between modern and colonial architecture in Brazilian capital: A case study timber house by Zanine Caldas in Brasilia, Brazil <i>Giselle Cormier, Ana Elisabete Medeiros and Ivan Manoel Valle</i> | 425 |
| São Sebastião' Chapel in Évora: A case of worship re-use <i>Virgínia Nascimento, Fernando Pereira, António Candeias and Alice Alves</i> | 427 |
| The effects of exterior lighting on the image of historical constructions: Proposal of guidelines <i>Diana Del-Negro</i> | 429 |
| The specificities of manor houses as built heritage: A case study <i>Rui Oliveira, Jorge Lopes and Isabel Abreu</i> | 431 |

| | |
|--|-----|
| Damage scenarios and construction typologies in the towns of Cocullo, Goriano Sicoli, Gagliano Aterno and San Demetrio ne' Vestini after the 2009 l'Aquila earthquake <i>Francesca Del Colombo, Francesco Campitiello and Gianfranco De Matteis</i> | 433 |
| Semi-public use of public spaces in shopping malls <i>Funda Arslan, Zeliha Burtek and Serdar Kasap</i> | 435 |
| CASE STUDIES | 437 |
